

# Datasheet:

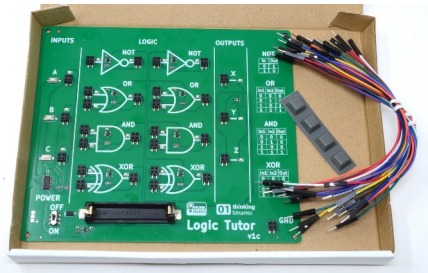

## LOGIC TUTOR

### DOC v1A

A kit for learning about logic gates.  
Including logic tutor board, connecting  
wires and a printed instruction manual.

The Logic Tutor board itself is powered  
from a single AAA battery.

#### Absolute Maximum Ratings

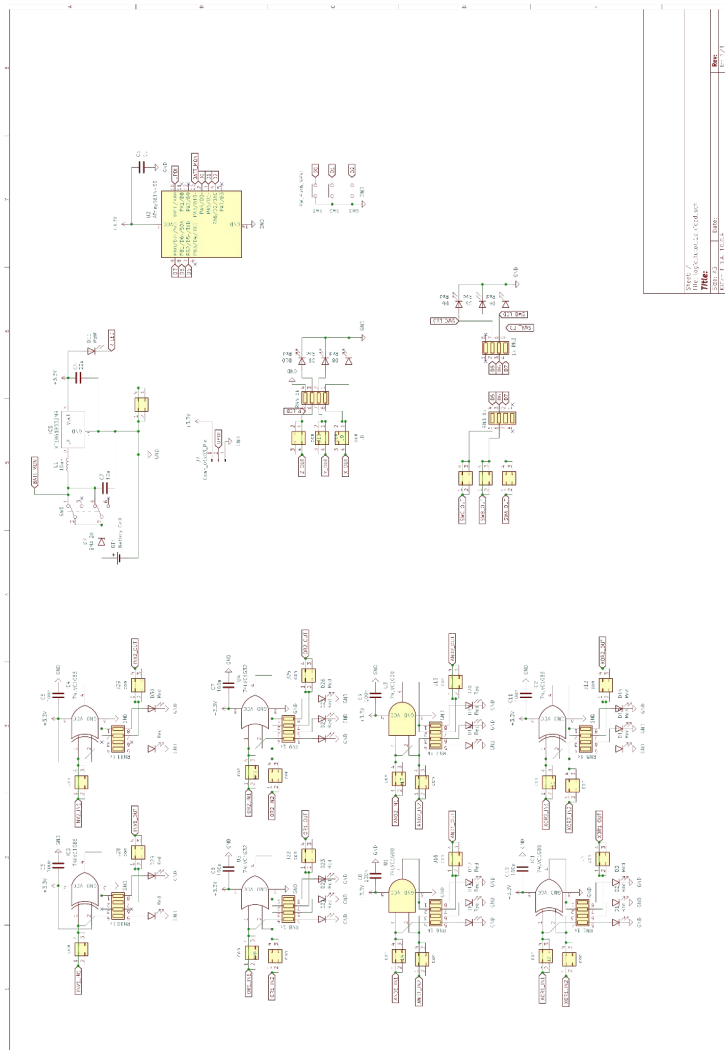

|                          |      | Units |
|--------------------------|------|-------|
| Max. AAA battery voltage | 1.65 | V     |

#### Electrical Characteristic

|                                      |     | Units |
|--------------------------------------|-----|-------|
| Min. AAA battery voltage             | 1.1 | V     |
| Typical quiescent power consumption. | 70  | mA    |
